Beschreibung

Jetstream® Welder Kit

The first affordable and fully approved unit to EN12941:1999. The Jetstream® is a large capacity filter and powered fan mounted on an adjustable waist belt. It weighs from 765g depending on model. Jetstream® delivers 180 Litres of air per minute through the filter, twice the current standard via a robust and highly flexible hose conveniently placed at the back of the unit.

The Jetstream® Welder Kit comes with everything you need to start welding straight out the box

Filter Performance

PSL filters offer an assigned protection factor (APF) of 20X Workplace Exposure Limit (WEL) for use with very fine dusts, fibres, fumes and aqueous mists.

Please contact JSP's technical helpline on +44(0)1993 826051 for further help with filter selection, alternatively you can view our online Product Selection Guides.
