Beschreibung

Stealth™ 16g

Stealth™ 16g is our lightest safety eyewear, weighing only 16g. Next generation ultra-thin and ultra-strong optically perfect lenses moulded using the latest technology to deliver a thinner lens that meets the EN166 1.F requirements.

The Stealth™ is available with two types of lens coating. The first is our advanced Premier Shield™ coating which offers anti-scratch and anti-mist protection and is available on the clear spectacles. The second coating is our Hardia+™ anti-scratch coating which offers scratch protection and is available in clear and smoke.

Features & Benefits

- **Our Lightest Spectacle** - At only 16g the Stealth™ 16g is the world's lightest safety spectacle.
- **Quality lens** - Dual 9.5 base ultra-thin & ultra-strong optically perfect lenses. Because they are so thin they transmit more light than other spectacles improving vision and lowering eye strain.
- **Integral nose bridge** - The built in nose bridge has been designed and shaped to fit most face shapes comfortably and securely.
- **Spectacle Cord Anchor** - The temple tips have a spectacle cord anchor point for further practicality, preventing loss or scratching from being put on rough surfaces.
- **Premier Shield™** - Stealth 16g is available in clear with our Premier Shield™ coating which gives the safety glasses anti-scratch and anti-mist properties. (Only available on Product ASA920-1A1-300)
- **Hardia+™** - Hardia+™ is an anti-scratch coating that is available on the Stealth™ 16g clear and smoked spectacles. (Available in clear ASA920-161-300 and smoke ASA920-163-000)

- Leichtgewichtige Schutzbrillen - - EN166 - - - Amber - One Size -
